

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application. Please cancel claims , amend claims , and add new claims as follows:

Listing of Claims:

1-29. (Canceled)

<sup>1</sup>  
~~30.~~ (Currently Amended) A photolithographic assembly for patterning a photoreactive layer, comprising:

a light source;

a support adapted to support the photoreactive layer proximate the light source;

a first photolithographic mask positioned between the light source and the support, the first photolithographic mask having a patterning portion for patterning a first portion of the photoreactive layer; and

a second photolithographic mask positioned between the light source and the support, the second photolithographic mask having a patterning portion for patterning a second portion of the photoreactive layer, at least part of the second photolithographic mask is positioned between the first photolithographic mask and the support.

31. (Canceled)

<sup>2</sup>  
~~32.~~ (Original) The assembly of claim ~~30~~<sup>1</sup> wherein the second photolithographic mask is positioned in alignment with the first photolithographic mask.

<sup>3</sup>  
~~33.~~ (Original) The assembly of claim ~~30~~<sup>1</sup>, further comprising a robotic handler for positioning the first and second photolithographic masks between the light source and the support.

<sup>4</sup>  
~~34~~. (Original) The assembly of claim 30 wherein the first photolithographic mask includes a first blocking portion for preventing exposure of the second portion of the photoreactive layer.

<sup>5</sup>  
~~35~~. (Original) The assembly of claim ~~34~~<sup>4</sup> wherein the second photolithographic mask includes a second blocking portion for preventing re-exposure of the first portion of the photoreactive layer.

<sup>6</sup>  
~~36~~. (Original) The assembly of claim ~~30~~<sup>1</sup> wherein the first patterning portion comprises a memory element portion.

<sup>7</sup>  
~~37~~. (Original) The assembly of claim ~~36~~<sup>6</sup> wherein the second patterning portion comprises a periphery portion.

<sup>8</sup>  
~~38~~. (Original) The assembly of claim ~~30~~<sup>1</sup>, further comprising a lens positioned between the light source and the support.

<sup>9</sup>  
~~39~~. (Original) The assembly of claim ~~30~~<sup>1</sup>, further comprising a condenser positioned between the light source and the support.
